

COSPONSOR THE CHRONIC KIDNEY DISEASE IMPROVEMENT IN RESEARCH AND TREATMENT ACT

HELP AMERICANS SUFFERING WITH CHRONIC KIDNEY DISEASE

Dear Colleagues,

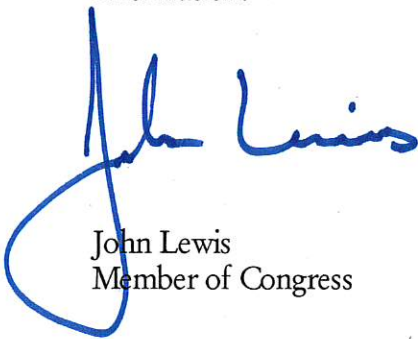

We invite you to join us as cosponsors of H.R. 3912, the *Chronic Kidney Disease Improvement in Research and Treatment Act*. This legislation would advance research and treatment options related to chronic kidney disease.

Today, more than one in 10 Americans suffer from some form of kidney disease - the ninth leading cause of death in the United States. Each year, more than 115,000 Americans are diagnosed with kidney failure or end-stage renal disease. Without a kidney transplant or life-saving dialysis, these are irreversible, fatal conditions.

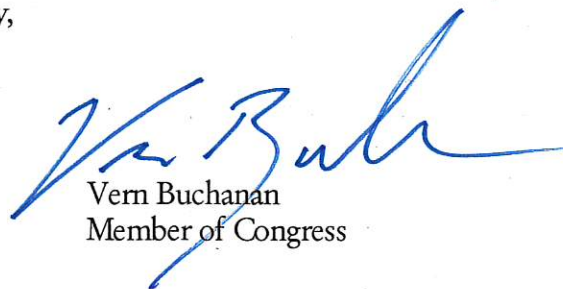

H.R. 3912 would expand kidney care access in underserved areas, improve care coordination for individuals on dialysis, and promote patient access to care and education. This legislation will help maintain an economically stable dialysis infrastructure while incentivizing innovation for new drugs, devices, and other technologies.

We urge you to co-sponsor this important legislation. Please contact thomas.dorney@mail.house.gov with Representative John Lewis (D-GA) or sean.brady@mail.house.gov with Representative Vern Buchanan (R-FL) to cosponsor or for more information.

Sincerely,

John Lewis
Member of Congress

Vern Buchanan
Member of Congress
