

# RENAL SUPPORT NETWORK'S SHARE YOUR SPARE

Kidney Donation and Transplant Discussion Kit

RSN's "Share Your Spare" campaign brings awareness to the public about their kidneys and how to keep them healthy, kidney disease treatment options, deceased organ donation and the option of living donation.

## How You Can Help

### Register to Be a Donor

You can sign up to be an organ donor, which is then indicated on your driver's license. It's important to express your wishes to your close family members so they can carry out those wishes if something unexpected happens to you.

### Living Donation Options

You can become an altruistic donor. This means that right now, while you're still alive, you can donate one of your kidneys. You can give a kidney to someone you know or to someone you don't know.
